

DATA SOVEREIGNTY PROTOCOL

DATA SOVEREIGNTY PROTOCOL (V.2026.1)

1. ZERO-TRACKING STANDARD

Flowstate Labs products contain no third-party analytics, no tracking pixels, and no telemetry-driven compromises.

2. LOCAL-FIRST INFERENCE

AI processing for consumer tools is executed on-device via Neural Engine or WebGPU delegates. Your data never touches a third-party server for inference.

3. DATA OWNERSHIP

All recipes and project data are stored locally or within a user-owned private iCloud container via Supabase. We do not own your intellectual property.

4. THE PURGE MECHANISM

In compliance with 2026 standards, every application includes a 'Purge Local Vault' toggle for the instant, permanent destruction of all local data caches.
